

CHIRAG MODI

DATA ANALYSIS

✉ modichirag.k@gmail.com ☎ 9773059145 📍 Kim 🌐 abcddev.com

PROFILE

Proficient in Python, SQL, NumPy, Pandas, and Data Visualization. Strong analytical and problem-solving skills with a passion for working with data and deriving meaningful insights. Eager to apply technical knowledge and learn in a professional Data Analyst role.

EXPERIENCE

Mern Stack

2024-01 — 2024-06

WeClocks Technology Pvt. Ltd.

Worked as a MERN Stack Developer Intern, where I developed and maintained web applications using MongoDB, Express.js, React.js, and Node.js. Assisted in creating responsive user interfaces, developing REST APIs, managing databases, and integrating frontend with backend services. Collaborated with team members to debug issues, improve application performance, and implement new features while following software development best practices.

Data Analyst

2025-12 — 2026-06

Codeat Infotech

Completed a Data Analyst Internship where I gained hands-on experience in data cleaning, data analysis, data visualization, and report generation using Python, Excel, NumPy, and Pandas. Analyzed datasets to identify trends and provide actionable insights for decision-making.

EDUCATION

computer

2019-01 — 2022-01

EXPERTISE

SQL · Numpy · Python · Pandas · Power Bi · Git · Mean stack

NOTABLE PROJECTS

E-commerce Analytics Dashboard

Without Power Bi

Developed an E-Commerce Analytics Dashboard using Python, Pandas, NumPy, Matplotlib, and Seaborn to analyze online sales data. The dashboard provides insights into sales performance, revenue trends, customer behavior, top-selling products, and order statistics. Data was cleaned, processed, and analyzed using Pandas and NumPy, while visualizations were created with Matplotlib and Seaborn to present key business metrics. The project helps in identifying sales patterns, monitoring business growth, and supporting data-driven decision-making.

Vivahdwar Matrimonial Website

Power BI,SQL,Numpy,Python,Pandas

Developed a Matrimonial Analytics Dashboard for the VivahDwar Matrimonial Website using Python, Pandas, NumPy, SQL, and Power BI. The project focused on analyzing user registration data, profile activities, membership plans, and matchmaking trends. SQL was used to extract and manage data from the database, while Python, Pandas, and NumPy were used for data cleaning, transformation, and analysis. Power BI was used to create interactive dashboards and visual reports that provide insights into user engagement, registration growth, and platform performance.

Site99 Website Builder

Only Power Bi

Developed an Analytics Dashboard for the Site99 Website Builder platform using Power BI. The dashboard was designed to monitor website creation activities, user engagement, subscription performance, and overall platform usage. Various datasets were transformed and modeled within Power BI to create interactive visualizations and reports. The dashboard helps track key performance indicators (KPIs), analyze user trends, and support data-driven business decisions.
